Technologies Used

HTML-> The Hypertext markup language which is used for creating web pages and web applications.

CSS-> Cascading Style Sheets is a style sheet language which is used to describe the look and formatting of a document written in markup language.

JavaScript-> JavaScript is a scripting language used to create and control dynamic website content, i.e. anything that moves, refreshes, or otherwise changes on your screen without requiring you to manually reload a web page.

Bootstrap-> A collection of HTML, CSS, and JavaScript tools for creating and building web pages and web applications. It is a free and open source project

Firebase-> It offers NoSQL and real-time hosting of databases, content, social authentication (Google, Facebook, Twitter and Github), and notifications, or services, such as a real-time communication server.

User Reviews

Appreciation by some of the Users, Source Of Our Motivation.

Divyanshi Varshney
@divyanshi

Awesome and fabulous website.
" Loved the way it works. Very user Friendly and easy to use and interact with. The apps, games and e-books here come in handy everyday. It has been a great experience. "

Ishika Chaturvedi
@ishika

Excellent website for browsing web apps.
" All day to day need apps available at a single place. Nice user interface. Keep up the good work. "

Aastha Goyal
@aastha

A Brand New alternate to other app stores.
" Whether it is weather app or live clock or quiz app or to do list or calculator, all are just tooo goood. I love to use them daily. Anywhere i am now i can easily keep check of my daily task list with this great to do list. I can create my own quizes without any fees and let my friends fill those as dares. Loved it. "

Anikate Agrawal
@anikate

Wherever you are our webapps are always there to help and support you.
" All for Free! No Charges ! No Fees ! "

Anonymous user
@anonymous

Great Experience using this website.
" I loved the unit converter, calculator and live clock. They are very useful to me. Credit to the developers. "
